An Example of the Usage of the Tufte-Handout Style[1]

The Tufte-LaTeX Developers

24 January 2009

[1] Inspired by Edward R. Tufte!

This document describes the Tufte handout LaTeX document style. It also provides examples and comments on the style's use. Only a brief overview is presented here; for a complete reference, see the sample book.

author: Ana Nelson

Example 1

First we assign variables:

```
> x <- 5
> y <- 7
```

Multiplication
Let's do some multiplication:

```
> x * y
[1] 35
```

Here's a graph:

```
> plot(c(1,2,3), pch=19, col="purple")
```
